Member Photo Consent

At StudSec, your privacy is our priority. When you registered, we asked if you were comfortable with your picture being shared on social media. Here are some frequently asked questions to clarify our policy.

Why do we take pictures?

While the workshops and other events are valuable on the day of the event, we believe establishing a strong public image is essential. Our sponsors, partners, and collaborators use this public image to support our mission. By sharing our activities on social media, we aim to make cybersecurity more accessible and aware to everyone.

What qualifies as being in the picture?

You will need to provide consent if your face is fully visible and identifiable in the photo. However, pictures that only show personal belongings, clothing (like shots from behind), or other attributes that do not clearly identify you do not require consent and may be posted. If you have any objections regarding specific pictures, please reach out to us, and we will gladly talk to find an agreement.

How do I change my preferences?

We understand that opinions may change over time. If you wish to update your consent preferences for any reason, simply fill out the following form. Your latest entry is the one that will count.
